

Brunswick County Chamber of Commerce
WOMEN
IN BUSINESS
Supporting Women. Connecting a Community.

About:

The Women in Business (WIB) Program is comprised of Brunswick County Chamber Members committed to fostering a supportive environment for women in business to thrive. While our committee members are all women in the business community, we benefit from the engagement of businessmen in our county who support the growth and success of women in business through sponsorship, recruitment and promotion of our program.

Mission:

To empower, educate and entertain emerging and established women in the workplace by providing guidance, support, resources and opportunities to be successful in the business world.

Goals:

To provide events and programs that will inspire confidence and foster professional achievement by helping women turn strengths into opportunities.

- *Through these programs, women will be able to identify their passions and path to success.*

To develop opportunities that encourage a community of aspiring businesswomen to connect both professionally and personally.

- *This network will have a continuing impact on their lives.*

To recognize the women of influence in our community and their roles in supporting and mentoring women in business.

- *Emerging businesswomen will gain exposure to influencers and resources to support their goals.*

Why join the committee:

As a member of the WIB Committee, you are a champion for women, helping to educate and empower them in our community. You gain recognition and increased visibility expanding your network and opening up professional opportunities for you and your business. We work together to enrich our programs offering you an opportunity to directly contribute to its growth and success through your input, experience and achievements.
